

Did You Know?

Online Banking has Scheduled Transfers

Transfer Frequency: Options include Daily, Weekly, Bi-Weekly, Monthly, Quarterly, Semi-Annually, and Annually

Next Transfer: This is where you select the date of your first transfer and tells the computer what date to use when making future payments.

Example: If you choose Nov. 16th with a frequency of Monthly then your transfers will happen on the 16th of each month. By this same example if you chose Weekly as the frequency and Nov 16th falls on a Monday, then your transfer will be made every Monday.

After your Transfer is scheduled it can be edited or deleted at any time directly from the Scheduled Transfer Page.

This feature can be used to schedule reoccurring transfers from one account to another or to a loan for payment.
